DURABLE & LOW MAINTENANCE VINYL
FENCE • PATIO COVERS • GAZEBOS • RAILS • GATES

www.duramaxBP.com

WHY VINYL?

Since its introduction into the US market over 30 years ago, vinyl has become the ultimate choice in durable, beautiful fencing. In the last ten years, even more homeowners are now looking to vinyl as the low maintenance alternative to wood. With the tremendous advantages vinyl fencing offers, here are five key reasons to make it your choice:

PERIMETER

DURAGRAIN PRIVACY

PATIO COVERS

1 Durable and Permanent

Vinyl fencing is the only fencing system that is durable and permanent. Unlike wood or metal, vinyl is designed to withstand the elements. Vinyl will never fade, rot, rust or look old. It's the only fence you'll need for the life of your property. With vinyl, you'll never have to worry about replacing your fencing or settling for a yard that looks old and rundown.

2 Low Maintenance

One of the best reasons for having vinyl fencing is that it is very low maintenance. Maintaining a wood or metal fence is more work than you may think. Imagine having to repaint or repair a faded, rotted, chipped or rusted fence every five years! And what happens when you give up and stop maintaining? Your property starts to look old. The beauty of vinyl is that it's low maintenance. Just wash your vinyl fence with soap and water and you have a fence that looks like brand new all over again!

3 Beautiful Designs

No other fencing gives you the beautiful choices that vinyl does. Don't just settle for a wood dog ear fence or a metal bar fence. Vinyl gives you all the design choices you could possibly ask for. A large variety of styles and designs with accents and accessories that match every setting makes vinyl fencing the most beautiful fence available today.

4 An Affordable, High-End Upgrade to your Property

With all the design choices for the front of your property, the back of the property, around the pool, as a garden separator and so much more, no other fencing can be such a high end upgrade to your property. Sure custom ornamental iron fencing is a beautiful option but it costs a fortune. Vinyl is much more affordable, offers many ornamental designs and is the best way to upgrade your property.

5 A Great Value Compared to Wood and Metal Fencing

Ordinary wood and metal fencing may seem more affordable than vinyl...but that's only on the day you buy them. Give a wood or metal fence just five short years and watch the maintenance costs creep on you. And when you don't want to replace them because the cost is too much, you're stuck with an ugly old fence that's a drag on your property. In a short five years, vinyl starts to become more affordable than any wood or metal alternative. And what's best is you'll never have to worry about repairing, repainting, or replacing your fence ever again!

GATES

WHY DURAMAX?

As the leading manufacturer of vinyl fencing in the west, we design our vinyl products specifically to withstand the hot Southwest sun. DuraMax has been manufacturing in Southern California for 25 years and we've perfected our vinyl products to meet the regions extreme weather conditions.

DURAGRAIN PRIVACY

PATIO COVERS, DECK & RAILING

TRADITIONAL

▶ **Proprietary DuraResin Material**

Our proprietary DuraResin vinyl formulation is specifically designed to stand up to the hot Southwest sun. DuraResin boasts over 12 parts of TiO2 (Titanium Dioxide) and highly perfected UV Inhibitors giving DuraMax vinyl the highest rated UV stability and weatherability of any vinyl. With DuraResin you won't worry about your vinyl fence yellowing. You can be sure you're getting the highest quality vinyl designed to give you a durable and permanent fencing solution.

▶ **"Route & Lock" Construction**

All DuraMax vinyl fencing is built by routing and interlocking the different fencing parts together. Routed and interlocked members are strong and will never pull apart. We don't use external brackets with unsightly screws that crack, break, discolor and fail over time. When you buy DuraMax, you are buying maximum durability.

▶ **DuraMax Exceeds The Industry Standard ASTM F964 for Vinyl Fencing**

How do you know if a vinyl fence is up to industry quality standards? Well fortunately, there is an industry standard ASTM F964 for vinyl fencing. The standard sets minimum quality levels for characteristics like impact resistance, heat warpage and cold temperature cracking. DuraMax beats these standards across every category! Ask for our technical sheets to learn more. If you're looking for a durable vinyl fence, make sure it exceeds ASTM F964 standards.*

▶ **Thick Walls for Strength and Durability**

The walls of all DuraMax vinyl fence materials are thick for strength and durability. Thicker walled materials eliminate problems such as warping, cracking and sagging for the life of the product and assures you that your DuraMax products will be trouble free for years to come.

Beautiful Designs Customized for your Property

DuraMax brings you beautiful designs that can be customized to match your specific architecture. We offer a large variety of post caps, picket styles, lattice tops and accessories to meet your every need. And every fence is custom designed and manufactured locally.

Local Fabricators and Trained Dealers

We have a network of trained local dealers and fabricators who can design and install your custom project. All of our products are installed by these professionals and will meet or exceed our factory standards.

PATIO COVERS

Vinyl Patio Covers Give You a Lifetime of Care-Free Use

Louvered patio covers provide superior shading and can include railing, lights, and fans

Low maintenance vinyl patio covers have become the product of choice by landscape designers, architects and homeowners.

These solid structures have an impressive look and feel.

This backyard comes to life with the addition of a vinyl patio cover

BENEFITS

- Low maintenance and durable vinyl
- Unlike wood, vinyl will NOT rot, warp, crack, attract termites, or ever need painting
- Unlike aluminium, vinyl is quiet in the rain and will be cool to the touch under the sun
- Available in white or tan

Free-standing or attached to your home, patio covers must be anchored to concrete or deck surfaces

This patio cover is attached to the structure of the house

Construction is all ROUTE-AND-LOCK so there are no unsightly screws or brackets that can rust or corrode. These routed patio structures are steel-reinforced and incredibly strong.

Go Green with DuraMax!

DuraMax Vinyl Building Products are 100% recyclable and reusable. They never need to end up in a landfill. In fact, we recycle over a million pounds of Poly Vinyl every year!

The USGBC found that Poly Vinyl performs better relative to environmental impact than alternative materials studied.
